VOIDFILLER NIUPACK

J2 Servid has developed the new product NIUPACK - known in the United States United as Voidfiller -, and it is used to protect the movement of merchandise during truck transport.

Niupack is the definitive solution to the displacements and fall of the load during transportation. It is an alveolar structure of unfolding honeycomb cardboard. Each piece snaps on easily the small gaps between the pallets acting as separators. In this way we avoid the fall and inclination of the products during transport and the dreaded domino effect.

100% RECYCLABLE AND REUSABLE

#WEPROTECT

VOIDFILLER NIUPACK

PROBLEM

During transport, the pallets move: acceleration, sudden braking, curves, roundabouts, etc. and the situation is aggravated when the merchandise does not occupy 100% of the perimeter of the pallet or when we send medium Euro pallets or quarters Euro-pallet, since the latter usually have the same height as standard pallets, but with less base, and therefore more unstable...

All these common movements during transport cause the displacement and fall of merchandise and in many cases the domino effect between pallets. This means that when our merchandise arrives at the customer's will be automatically rejected or repalletized with the loss of time and money that it means.

In addition, current containers and packaging are less and less resistant (Made with recycled cardboard, increasingly lower grammage, ...)

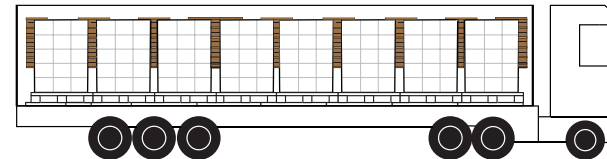

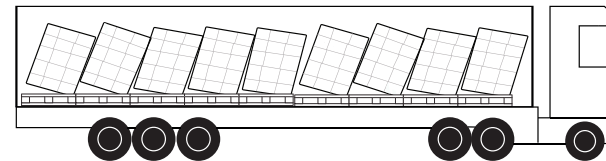

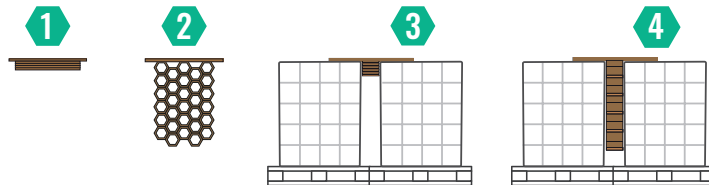

#WEPROTECT

VOIDFILLER NIUPACK

SOLUTION

The solution to these problems is to fill the existing gaps between pallets with the Niupack system to reduce or eliminate balancing, tilting or falling of merchandise and thus ensure that the load reaches its destination in perfect state.

#WEPROTECT

VOIDFILLER NIUPACK

SECTORS

It is mainly used for the mass consumption sector, food, beverages, liquid detergents, cosmetics, chemicals, electronics, logistics in general, ... and for any type of goods transported by truck to department stores distribution or destined for automated warehouses, where the merchandise must be in perfect condition.

SECTORS

#WEPROTECT

VOIDFILLER NIUPACK

ADVANTADGES

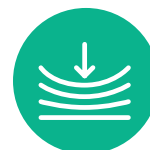

Economic

Does not require expensive investments.

Effective

Tested in hundreds of road trips.

Resistant

More than 4,000 kilos of compressive strength.
Compressive strength 4,081 kgf*

(*) Laboratory test

Recyclable

Favor the environmental policies and CSR

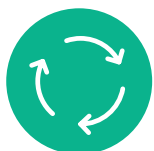

Single

There is no other similar solution in the market for road trips.

Rápido

Training is not necessary.

Reusable

Thanks to his extraordinary endurance.

Folding

Does not take up space

Patented

Multiple patented Niupack models.

#WEPROTECT

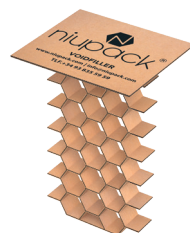

VOIDFILLER NIUPACK

OTHER MODELS

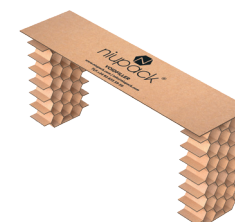

Niupack Large

Aimed at large consumption sectors such as food and beverages and laboratories, the chemical industry and transport and logistics companies in general..

Niupack Top

The smallest model in the family to avoid the domino effect that can occur as a result of driving.

Niupack Double

Union of two systems of voidfillers. Ideal to protect loose pallets in trucks and to gain longitudinal space in maritime containers.

Niupack Box

The voidfiller that can be folded for transport or storage, thus saving a lot of space during transport and storage.

Niupack Block

Used for rigid goods in the sectors of machinery, consumer electronics and transport and logistics companies in general.

Niupack Panel

The honeycomb system is covered by two panels of kraft paper. It is ideal for protecting the sides of the pallet and for separating and stabilizing stacked pallets.

Niupack Side

This voidfiller has a smaller, foldable upper side cover so that it can be placed inside the stretch film that wraps the pallets, avoiding placing the cover on top of the pallet and reducing cardboard.

VOIDFILLER NIUPACK

SIZES

Niupack is a patented honeycomb system, and it is made with a very resistant folding cardboard structure, recyclable and reusable. Available in various sizes and possibility of custom manufacturing.

TYPE	THICKNESS	UNITY/PALLET
NIUPACK S60	60mm	640
NIUPACK S75	75mm	640
NIUPACK S85	85mm	640
NIUPACK S100	100mm	640
NIUPACK S120	120mm	450
NIUPACK S150	150mm	450
NIUPACK L100	100mm	140
NIUPACK L150	150mm	140

Types S
60 x 38 cm

Types L
120 x 60 cm

VOIDFILLER NIUPACK

LABORATORY

With all the products we produce we carry out tests in an official packaging laboratory to achieve maximum resistance for each model.

FICHA TÉCNICA

Niupack Double S150

Características	<p>Ancho externo: 600 mm (tolerancia + 3,5%) x 1300mm</p> <p>Ancho interno: 190 mm (tolerancia + 3,5%)</p> <p>Longitud cerrado: 45 mm (tolerancia + 3,5%)</p> <p>Longitud abierto: entre 700 y 1000 mm</p> <p>Construcción: Tapa superior 560 x 1300 mm fabricado con cartón ondulado y cubierto con papel kraft.</p> <p>2 estructura Niupack: 600 X 150 mm fabricado con 14 tiras de cartón ondulado de 600 x 190 mm y unidas por una tapa de cartón superior.</p>
Especificación material	<p>Tapa superior: cartón ondulado recubierto con 2 capas de papel kraft</p> <p>Estructura Niupack: cartón ondulado con 2 capas de papel</p> <p>Resistencia media: 1063/40 kg (test laboratorio Itene) x2 = 3,726/80</p>
Aplicación	<p>Recomendado para rellenar huecos existentes entre palets.</p> <p>Niupack recomendado para espacios entre 160 mm y 190 mm</p>
Embalaje	<p>Unidades: 240 Unidades/palet</p> <p>Medida del palet: 1000 x 1200 mm x 1200 altura (remontables)</p> <p>Peso del palet: 250 Kg.</p>

VOIDFILLER NIUPACK

ABOUT US, WHAT DO WE DO?

J2 Servid is a company with more than 25 years of experience in the packaging market for the protection of goods during transport.

Our products are essential for your merchandise to be transported in perfect condition and thus avoid damage during transport, such as movement of loads, breakage, humidity problems, sudden changes in temperature, etc.

We have extensive experience in the sector to be able to suggest at all times, which is the perfect system to protect your freight. We take care of your case, advising you and offering you the solution to your problems.

Our philosophy is to constantly look for new solutions and innovate new products to protect your load.

We are in an increasingly globalized market, where goods are exported to more distant countries and often in extreme conditions, so it is convenient to protect them in a proper way during transport.

J2 Servid offers you a wide range of different solutions to protect your freight during transport, by any means: sea, road, air or rail.

VOIDFILLER NIUPACK

PRODUCTS TO SECURE CARGO

ProBag

INFLATABLE BAGS

- It is the most versatile system to secure the goods.
- Easy to use system.
- The products arrive at their destination without damage or claims.
- Available for truck, train, ship, container...

ProDry

DESICCANT BAGS

- Protect goods from moisture during storage.
- High absorption capacity.
- Available with or without hook.
- Suitable for food environments.

ProTerm

COVERLINER COVERS AND INSULATORS

- Avoid sudden temperature changes during transportation.
- Ideal for sea containers and also for palletized merchandise.
- Manufacture of customized pallet covers.
- Easy placement system.

#WEPROTECT

VOIDFILLER NIUPACK

LASHING STRAPS AND CARGO MOORING SYSTEMS

ProLash

LASHING STRAPS AND CARGO MOORING SYSTEMS

- Ideal system for non-palletized loads.
- Very easy placement system.
- Can be manually tightened.
- Ideal system to prevent theft.

ProLash TY Gard

- Considered the best lashing system for containers.
- Acts like a safety belt, absorbing shocks and dissipating energy.
- System approved for the transport of explosives and dangerous goods (AAR approved).
- Ideal for drums, big-bags and IBC's.

ProEdge

PROTECTIVE CORNERS FOR TRANSPORTATION

- Different measures, materials and resistances.
- Different models adaptable to all types of loads.
- Special models for paper reels.
- Possibility of custom manufacturing

#WEPROTECT

VOIDFILLER NIUPACK

PRODUCTOS PARA ASEGURAR LA CARGA

ProSlide

NON-SLIP

- Prevents the pallets from slipping during transportation.
- Available in different sizes and thicknesses.
- System certified according to international standards.
- We also have non-slip paper inserters for pallets.

ProVoidGard

- New manual lashing system adaptable to all kinds of gaps.
- Avoid lateral and longitudinal movements.
- Reusable, easy to use and very resistant. (AAR approved).
- Available in 2 sizes.

Niupack

- Prevents the movement and inclination of the goods during transportation.
- Fills the gaps between pallets (underhang).
- Ideal system for goods that do not occupy the 100% of the perimeter of the pallet.
- Very resistant, foldable, reusable, recyclable and economical.
